I am writing this letter to urge you to reject HR 4026. As a traveler it is hard to get the traffic and weather information for a particular area unless you are familiar with the local stations and even so with xm radio I can get a traffic or weather report in advance so I can adjust my route accordingly. I pay monthly for this service and the NAB should have no influence over what will be broadcasted by its competitors. Please reject the NAB's petition 04-106. Thank You
